Summary

Melinis minutiflora is a spreading perennial mat grass originating from Africa. Distinguished by its sticky, strong smelling foliage, it was widely introduced to tropical countries as a fodder grass and soon became naturalised. The odour of fresh *Melinis minutiflora* is believed to repel insects, ticks and snakes. *Melinis minutiflora* grass was used as a pioneer species for planting in poor soils as it smothers any weeds that may emerge. It is considered a nuisance weed in many parts of the world including Hawaii, Brazil, Venezuela and Columbia.
