**System:** Terrestrial

Kingdom	Phylum	Class	Order	Family
Plantae	Magnoliophyta	Magnoliopsida	Violales	Begoniaceae

## Common name

## Synonym

*Begonia cucullata*, var. *hookeri* (A. DC.) L.B. Sm. & Schub.  
*Begonia semperflorens*, Link & Otto

## Similar species

## Summary

*Begonia cucullata* is a herbaceous perennial plant native to South America. The begonia genus includes nearly 900 species and almost all of the Begoniaceae family. Many species have been used to obtain thousands of horticultural varieties. Introduced for ornamental purposes, *Begonia cucullata* is naturalized in Hawaii and in La Réunion, where the species is considered invasive in natural and semi-natural environments.
