Paspalum scrobiculatum, var. *commersonii* (Lam.) Stapf
Paspalum scrobiculatum, var. *polystachyum* (R. Br.) Stapf

Similar species

Summary *Paspalum scrobiculatum* is a noxious weed in the United States and is potentially invasive in the Pacific.

[view this species on IUCN Red List](#)

Species Description

Paspalum scrobiculatum is a tufted perennial grass; 120 to 150 cm tall; culms stout, erect, glabrous, somewhat bulbous at base, sheaths 7 to 14 cm long, glabrous or with sparse hairs at the collar, compressed, basal ones often purplish; ligule very short, but with a dense row of hairs just behind it; blades flat, 12 to 40 cm long, 3 to 12 mm wide, acute, scabrous, glaucous on upper surface; inflorescence of 4 to 6 racemes, these 2 to 4 cm long, alternate, distant, their axis 4 to 9 cm long, villous at base, sometimes pilose in the axils; rachis 1 to 1.5 mm wide, scabrous, usually reddish on the margins; spikelets paired, 2 to 2.5 mm long, broadly elliptic, imbricate, glabrous; second glume and sterile lemma 3-nerved; fertile lemma indurated, finely pitted; caryopsis 1.5 mm long, compressed-elliptic, pale (Stone 1970, in PIER 2006).

Uses

Paspalum scrobiculatum is economically important. Its uses include: human food (cereal), animal food (fodder, forage) and medicine (USDA-NRCS 2008). It is harvested as a wild cereal in west Africa and in India.

GLOBAL INVASIVE SPECIES DATABASE

FULL ACCOUNT FOR: *Paspalum scrobiculatum*

Habitat Description

Invaded habitat: Along the ditch, road sides, upland and tidal rice fields, rubber plantations; wet, open, cultivated areas; up to 1800 m altitude (SEAMEO BIOTROP 2008).

In Fiji, *Paspalum scrobiculatum* is abundant at elevations up to 1300 m in clearings, along roadsides, in pastures, ditches, waste land, etc. (Smith 1979, in PIER 2006). In Hawaii, *P. scrobiculatum* is common on slopes in poor, thin soil where few other grasses will grow, and in wet, swampy ground, 0 to 1070 m (Wagner *et al.* 1999, in PIER 2006).

General Impacts

Paspalum scrobiculatum is declared a 'noxious or quarantine weed' in at least ten states in America. It is declared a noxious weed by the Animal and Plant Health Inspection Service of the United States Department of Agriculture (USDA-APHIS).
