

Discoglossus pictus

System: Freshwater_terrestrial

Kingdom	Phylum	Class	Order	Family
Animalia	Chordata	Amphibia	Anura	Alytidae

Common name Painted frog (English)

Synonym *Pseudis picta* ,(Otth, 1837)
Pseudes pictus ,(Otth, 1837)
Discoglossus pictus subsp. vittata ,Camerano, 1884
Discoglossus pictus subsp. pictus
Discoglossus pictus subsp. ocellata ,Camerano, 1884
Discoglossus pictus subsp. auritus ,Herón-Royer, 1888
Discoglossus auritus ,Herón-Royer, 1888
Discoglossus algirus ,Lataste, 1879
Colodactylus coerulescens ,Tschudi, 1845
Colodactylus caerulescens ,Tschudi, 1845

Similar species

Summary The Painted frog *Discoglossus pictus* is found on sandy coastal areas or in Mediterranean woodlands. The species thrives and breeds in lentic freshwater marshes or brackish coastal marshes. Native to the countries of Northern Africa, the painted frog was introduced into the Iberian Peninsula 100 years ago and its distribution has steadily increased since then. It is recorded to have been introduced into France in 1906. Studies show that the Painted frog can compete with native species and their juveniles causing changes in the native populations of anurans including times of metamorphosis, reduced mortality including survival, body mass and activity.
