

MN (Minor) *Pipa parva*

Date assessed	2021-06-06
Year published	2021
Eicat category	MN (Minor)
Justification for EICAT assessment	<i>Pipa parva</i> was found in high densities in the invaded region and a stomach content study found that it feeds primary on benthic invertebrates (Measey and Royero 2005), however no population decline of the prey was reported.
Confidence rating	Low
Mechanism(s) of maximum impact	Predation
Countries of most severe impact	Venezuela
Description of impact	Predation - Stomach contents study found that <i>Pipa parva</i> had a diet of benthic invertebrates.
Assessor	John Measey
