MN (Minor)Ploceus melanocephalus

Date assessed	2021-11-11
Year published	2022
Eicat category	MN (Minor)
Justification for EICAT assessment	The Black-headed weaver has been observed feeding on insects in Spain (Sanz-Aguilar et al. 2015).
Confidence rating	Low
Mechanism(s) of maximum impact	Predation
Countries of most severe impact	Spain
Description of impact	The black-headed weaver feeds on native insect species and the seeds of native plant species. It could also compete with native passerines once the species reaches higher population densities.
Assessor	Tom Allmert; Thomas Evans
Contributors	
Reviewers	EICAT authority
