

## **GLOBAL INVASIVE SPECIES DATABASE**

EICAT profile: Anser cygnoid

## MN (Minor)Anser cygnoid

Date assessed 2021-10-15 Year published 2023 MN (Minor) **Eicat category Justification for EICAT** assessment There are reports of Swan Geese hybridizing with Greylag Geese (Anser anser) in Europe in the wild. There is no evidence that this has caused a decline of Greylag Geese (Gebhardt 1996, Geiter et al. 2002, Randler 2004, Banks 2008). Confidence rating Low Hybridisation Mechanism(s) of maximum impact Countries of most severe Germany; Netherlands; United Kingdom; Italy impact Description of impact The Swan Goose hybridizes with the Greylag Goose in Europe and shows aggressive behavior towards native birds. Thomas Evans; Tom Allmert **Assessor Contributors Reviewers EICAT** authority Thomas Evans; Tom Allmert. (2025). Anser cygnoid . <u>IUCN Environmental Impact Classification for Alien</u> **Recommended citation**
