

DD (Data Deficient) *Eupsittula pertinax*

| | |
|---|--|
| Date assessed | 2021-09-22 |
| Year published | 2022 |
| Eicat category | DD (Data Deficient) |
| Justification for EICAT assessment | It is not known if this introduced population has had any effects on resident species. No other parrots occur on San Andrés Island (McNish 2003), but it is plausible that Brown-throated Parakeet could compete for food with other large frugivores, such as resident pigeon species (Donegan and Huertas 2011). |
| Confidence rating | |
| Mechanism(s) of maximum impact | Competition |
| Countries of most severe impact | Colombia |
