MC (Minimal Concern)Platycercus eximius

Date assessed	2021-09-27
Year published	2023
Eicat category	MC (Minimal Concern)
Justification for EICAT assessment	Eastern Rosellas have been observed to feed on flowers of native plant species like Puriri (Vitex lucens), New Zealand flax (Phormium tenax) or Kahikatea (Dacrycarpus dacrydioides). There is no evidence that herbivory by Eastern Rosellas affected the performance of these species (Wright and Clout, 2001).
Confidence rating	Low
Mechanism(s) of maximum impact	Grazing/herbivory/browsing
Countries of most severe impact	New Zealand
Description of impact	The Eastern Rosella feeds on native plant species in New Zealand.
Assessor	Thomas Evans; Tom Allmert
