

MC (Minimal Concern)*Platycercus eximius*

| | |
|---|--|
| Date assessed | 2021-09-27 |
| Year published | 2023 |
| Eicat category | MC (Minimal Concern) |
| Justification for EICAT assessment | Eastern Rosellas have been observed to feed on flowers of native plant species like Puriri (<i>Vitex lucens</i>), New Zealand flax (<i>Phormium tenax</i>) or Kahikatea (<i>Dacrycarpus dacrydioides</i>). There is no evidence that herbivory by Eastern Rosellas affected the performance of these species (Wright and Clout, 2001). |
| Confidence rating | Low |
| Mechanism(s) of maximum impact | Grazing/herbivory/browsing |
| Countries of most severe impact | New Zealand |
| Description of impact | The Eastern Rosella feeds on native plant species in New Zealand. |
