

GLOBAL INVASIVE SPECIES DATABASE

EICAT profile: Platycercus eximius

MC (Minimal Concern)Platycercus eximius

Date assessed	2021-09-27
Year published	2023
Eicat category	MC (Minimal Concern)
Justification for EICAT	
assessment	Eastern Rosellas have been observed to feed on flowers of native plant species like Puriri (Vitex lucens), New Zealand flax (Phormium tenax) or Kahikatea (Dacrycarpus dacrydioides). There is no evidence that herbivory by Eastern Rosellas affected the performance of these species (Wright and Clout, 2001).
Confidence rating	Low
Mechanism(s) of	Grazing/herbivory/browsing
maximum impact	
Countries of most severe	New Zealand
impact	
Description of impact	The Eastern Rosella feeds on native plant species in New Zealand.
Assessor	Thomas Evans; Tom Allmert
Contributors	
Reviewers	EICAT authority
Recommended citation	Thomas Evans; Tom Allmert. (2025). <i>Platycercus eximius</i> . <u>IUCN Environmental Impact Classification for</u> <u>Alien Taxa (EICAT)</u> .
