

## **GLOBAL INVASIVE SPECIES DATABASE**

EICAT profile: Platycercus eximius

## MC (Minimal Concern)Platycercus eximius

Date assessed 2021-09-27 Year published 2023 MC (Minimal Concern) **Eicat category Justification for EICAT** assessment Eastern Rosellas have been observed to feed on flowers of native plant species like Puriri (Vitex lucens), New Zealand flax (Phormium tenax) or Kahikatea (Dacrycarpus dacrydioides). There is no evidence that herbivory by Eastern Rosellas affected the performance of these species (Wright and Clout, 2001). **Confidence rating** Grazing/herbivory/browsing Mechanism(s) of maximum impact Countries of most severe New Zealand **Description of impact** The Eastern Rosella feeds on native plant species in New Zealand. Assessor Thomas Evans; Tom Allmert **Contributors** Reviewers EICAT authority Recommended citation Thomas Evans; Tom Allmert. (2025). Platycercus eximius . <u>IUCN Environmental Impact Classification for</u> Alien Taxa (EICAT).
