MN (Minor)Ploceus cucullatus

Date assessed	2021-10-18
Year published	2023
Eicat category	MN (Minor)
Justification for EICAT assessment	The population explosion on Haiti in the 1960s resulted in killing of many trees by defoliation for nesting material (Lever 2005).
Confidence rating	Low
Mechanism(s) of maximum impact	Grazing/herbivory/browsing
Countries of most severe impact	Republic of Haiti
Description of impact	The Village Weaver feeds on native insect species and native trees were killed by defoliation for nesting material on Haiti.
Assessor	Thomas Evans; Tom Allmert
Contributors	
Reviewers	EICAT authority
