

MC (Minimal Concern)*Psittacara acuticaudatus*

<b>Date assessed</b>	2021-09-22
<b>Year published</b>	2022
<b>Eicat category</b>	MC (Minimal Concern)
<b>Justification for EICAT assessment</b>	The Blue-crowned Parakeets foraged together, often calling loudly, particularly just before taking flight. Their preferred food items were similar to those of Rose-ringed Parakeets and included, for example, tree buds, shoots and blossom. Blue-crowned Parakeets in the Bromely area have also been observed feeding on peanuts, sunflower seeds and commercial seed mix in nearby gardens.
<b>Confidence rating</b>	Low
<b>Mechanism(s) of maximum impact</b>	Grazing/herbivory/browsing
<b>Countries of most severe impact</b>	United Kingdom
<b>Description of impact</b>	The Blue-crowned Parakeet feeds on native plant species in Britain.
