

## MC (Minimal Concern) *Streptopelia roseogrisea*

<b>Date assessed</b>	2021-10-01
<b>Year published</b>	2022
<b>Eicat category</b>	MC (Minimal Concern)
<b>Justification for EICAT assessment</b>	The African Collared-dove has been observed feeding on native plant species in Australia. There is no evidence that this has caused declining populations of native species (Paton and Barrington 1985).
<b>Confidence rating</b>	Low
<b>Mechanism(s) of maximum impact</b>	Grazing/herbivory/browsing
<b>Countries of most severe impact</b>	Australia
<b>Description of impact</b>	The African Collared-dove feeds on native plant species.
<b>Assessor</b>	Thomas Evans; Tom Allmert
<b>Contributors</b>	
<b>Reviewers</b>	EICAT authority
