

GLOBAL INVASIVE SPECIES DATABASE

EICAT profile: Streptopelia roseogrisea

MC (Minimal Concern)Streptopelia roseogrisea

Date assessed	2021-10-01
Year published	2022
Eicat category	MC (Minimal Concern)
Justification for EICAT	
assessment	The African Collared-dove has been observed feeding on native plant species in Australia. There is no evidence that this has caused declining populations of native species (Paton and Barrington 1985).
Confidence rating	Low
	Grazing/herbivory/browsing
maximum impact	
Countries of most severe	Australia
impact	
Description of impact	The African Collared-dove feeds on native plant species.
Assessor	Thomas Evans; Tom Allmert
Contributors	
Reviewers	EICAT authority
Recommended citation	Thomas Evans; Tom Allmert. (2025). <i>Streptopelia roseogrisea</i> . <u>IUCN Environmental Impact Classification</u> for Alien Taxa (EICAT).
