EICAT profile: Agapornis personatus

MN (Minor)Agapornis personatus

Date assessed	2021-09-27
Year published	2023
Eicat category	MN (Minor)
Justification for EICAT	
assessment	Yellow-collared lovebird can displace native Cypsiurus parvus for breeding purposes in Kenya. There is no evidence that this has caused a decline in populations of Cypsiurus parvus (Lever 1994).
Confidence rating	Low
Mechanism(s) of	Competition
maximum impact	
Countries of most severe	
impact	
Description of impact	The yellow-collared lovebird competes with native bird species and can displace them for breeding purposes. They also feed on native plant species, hybridizes with another Agapornis species in captivity and is a carrier of parasites and diseases in captivity in the alien range.
