MN (Minor)Geopelia striata

Date assessed	2021-10-19
Year published	2023
Eicat category	MN (Minor)
Justification for EICAT assessment	The Zebra Dove is a host of Trichomonas gallinae and avian pox on Hawaii, which had also been detected in native bird species, for example the Apapane (Himatione sanguinea).There is no evidence that this has caused a decline of these species (Van Riper and Van Riper 1985, Hawaii Horticulture 2013, Hawaii Bird Guide).
Confidence rating	Low
Mechanism(s) of maximum impact	Transmission of diseases to native species
Countries of most severe impact	U.S.A.
Description of impact	The Zebra Dove is a host of a disease which has also been detected in native bird species.
