

GLOBAL INVASIVE SPECIES DATABASE

EICAT profile: Horornis diphone

MN (Minor)Horornis diphone

Date assessed	2021-09-27
Year published	2023
Eicat category	MN (Minor)
Justification for EICAT	
assessment	The Japanese Bush-warbler has been observed to feed on native invertebrates on Hawaii. There is no evidence that this has caused a decline of these species (Foster 2005, Scinto 2018).
Confidence rating	Low
Mechanism(s) of	Predation
maximum impact	
Countries of most severe	U.S.A.
impact	
Description of impact	The Japanese bush-warbler feeds on native invertebrate and plant species and might compete with native bird species for food on Hawaii.
Assessor	Tom Allmert; Thomas Evans
Contributors	
Reviewers	EICAT authority
Recommended citation	Tom Allmert; Thomas Evans. (2025). <i>Horornis diphone</i> . <u>IUCN Environmental Impact Classification for</u> <u>Alien Taxa (EICAT)</u> .
