

**MN (Minor)** *Lophura leucomelanos*

<b>Date assessed</b>	2021-10-07
<b>Year published</b>	2023
<b>Eicat category</b>	MN (Minor)
<b>Justification for EICAT assessment</b>	Kalij Pheasants prey on insects. There is no evidence that this has caused a decline of these species (Navas 1987).
<b>Confidence rating</b>	Low
<b>Mechanism(s) of maximum impact</b>	Predation
<b>Countries of most severe impact</b>	Argentina
<b>Description of impact</b>	The Kalij Pheasant feeds on native plant and insects species and competes with the native fauna in Argentina. They also disperse alien/invasive seeds in Hawaii.
<b>Assessor</b>	Tom Allmert; Thomas Evans
