

## MN (Minor) *Perdix perdix*

<b>Date assessed</b>	2021-09-14
<b>Year published</b>	2023
<b>Eicat category</b>	MN (Minor)
<b>Justification for EICAT assessment</b>	Farm-bred Grey Partridges have been observed to hybridize with the wild subspecies <i>Perdix perdix</i> . This may complicate recovery of wild partridge populations, which have suffered serious declines in numbers in recent decades in Denmark. There is no evidence that hybridisation caused a decline of this species (Andersen and Kahlert 2012).
<b>Confidence rating</b>	Low
<b>Mechanism(s) of maximum impact</b>	Hybridisation
<b>Countries of most severe impact</b>	Denmark
<b>Description of impact</b>	Farm-bred Grey Partridges hybridize with the wild subspecies of Grey Partridges.
