MC (Minimal Concern)Psilopogon lineatus

| | |
|---|---|
| **Date assessed** | 2021-10-08 |
| **Year published** | 2023 |
| **Eicat category** | MC (Minimal Concern) |
| **Justification for EICAT assessment** | "The lineated barbet, like most barbets, is well known as a frugivore, but generally has a varied diet that comprises mainly of fruits, especially those of figs. Lineated barbets have been observed to feed on the fruits and flowers of exotic species. Their favourite fruits are however those of figs, which they depend strongly on, especially those of the strangler, Malayan banyan (Ficus microcarpa) and the yellow-stemmed fig (Ficus fistulosa)." (Lok et al. 2009) |
| **Confidence rating** | Low |
| **Mechanism(s) of maximum impact** | Grazing/herbivory/browsing |
| **Countries of most severe impact** | Republic of Singapore |
| **Description of impact** | The lineated barbet feeds on native plant species and and it was seen showing aggression towards native woodpeckers in Singapore. |
