MN (Minor)Sinosuthora webbiana

Date assessed	2021-09-30
Year published	2023
Eicat category	MN (Minor)
Justification for EICAT assessment	Vinous-throated parrotbills feed on native insects in Italy and the Netherlands. There is no evidence that this has caused a decline of population of insect species (Luoni 2009, Lensink and van der Have 2013).
Confidence rating	Low
Mechanism(s) of maximum impact	Predation
Countries of most severe impact	Netherlands; Italy
Description of impact	The Vinous-throated Parrotbill feeds on native insect and plant species. It has an overlap in diet with native bird species in Italy.
Assessor	Tom Allmert; Thomas Evans
