GLOBAL INVASIVE SPECIES DATABASE

EICAT profile: ***Pycnonotus sinensis***

DD (Data Deficient)Pycnonotus sinensis

Date assessed	2021-11-29
Year published	
Eicat category	DD (Data Deficient)
Justification for EICAT assessment	Impact: Competition with native birds. Native organism(s) affected: Native birds such as Brown-eared Bulbul Microscelis amaurotis (competition).
Confidence rating	
Mechanism(s) of maximum impact	Competition
Countries of most severe impact	Japan
Description of impact	According to the National Institute for Environmental Studies, Japan (2015), the Light-vented Bulbul competes with native bird species in Japan. However, there is no information available on the effects of this competition on native species. The actual impact may be higher than currently recognized.
